

Subject: FedMall V22.2.1.1 Public Release Notes
SP4709-17-D-0034/SP4709-20-F-0098

1.0 Release Details

FedMall Release V22.2.1.1 will go live on February 4, 2022. These notes describe all functional changes and how those changes affect the use of FedMall.

1.1 Purpose

This document captures the functional release notes describing an update to the FedMall system. Except where otherwise noted, this document describes the availability of new or updated functionality in the Production (“PROD”) environment, i.e., available to the generality of FedMall users.

1.2 Release Overview

System	FedMall
Availability Date	February 4, 2022
FedMall Software Version	V22.2.1.1

1.3 Updates to FedMall Commerce

This software release includes updates to the following capabilities:

Capability	Description	Reference ID
Update logic to perform search for Ability One equivalent items	Logic has been updated to perform the search for Ability One equivalent items when the shopper clicks the link on the PDP.	119214
Strip escaped double quotes provided by PIEE JSON	Logic was added to Commerce registration screen to strip the escaped double quotes in the common name field and allow the user to complete the selections.	125601
ACE: Not require postal code on email purchase orders	Postal Code is now non-mandatory in IIB when the Country is non-US. Email purchase orders have been allowed to be generated and delivered when Postal Code field is null.	70608

1.4 Updates to FEDS

This software release includes updates to the following capabilities:

Capability	Description	Reference ID
Set timestamp for created and modified date fields on EBS Long Term Contract Data Loads	Fixed the timestamps to be set on Contract_Master modified and created date fields on the LTC data loads. The export will now pick up contracts that were modified.	125600

Remove Weapon System Name from FEDS exports	Removed the 'Weapon System Name' attribute from FEDS export, this attribute will no longer appear on items in Commerce.	125862
Fix duplicate primary key check in FEDS data loader	Records with duplicate reference numbers and CAGE codes are invalidated by the duplicate primary key check when processed through the FEDS data loader.	125599
FEDS Requirement Rule (Canceled NSNs)	NSN Buyability rules need to be updated to consider NIIN Status Code. FLIS uses the NIIN Status Code to signal when a given NSN has been canceled or no longer procurable. FEDS data loader requirement for assigning NSN buyable status, NIIN Status Code is '0' or '1', was missing.	96791
Add Unit of Measure validation to EBS Long Term Contract Data Loads	Applied the Unit of Measure validation to the EBSLTC data feed.	125598
Set Export Flag for archived contracts in FEDS	Auto archival of expired contracts has been fixed by moving the check for naturally expiring contracts to the top of the contract master table. All exports are now based on the 'export status flag' which will update when a contract is expiring.	125652

1.5 Updates to CU

This software release includes updates to the following capabilities:

Capability	Description	Reference ID
TF33 FW: Significant WSSP Changes	WS3 process has been changed to not remove the WS3 from the SFTP until the process has been completed.	124686

1.6 Updates to KeyCloak

This software release includes updates to the following capabilities:

Capability	Description	Reference ID
FEDS Event Logging	Event 'Logging' settings in KeyCloak have now been implemented	N/A

1.7 Updates to ACE

This software release includes updates to the following capabilities:

Capability	Description	Reference ID
ACE: Not require postal code on email purchase orders	Postal Code is now non-mandatory in IIB when the Country is non-US. Email purchase orders have been allowed to be generated and delivered when Postal Code field is null.	70608
